

AUGUSTINE GYAMPRAH

PROFESSIONAL SUMMARY

Motivated and hard-working Software Engineering student currently completing a BSc at the University of Portsmouth, with hands-on experience in front-end development, business systems integration, and customer-focused technical support roles. Skilled in Python, JavaScript, SQL, HTML/CSS, Git, and UI/UX design tools, with a strong ability to turn real business requirements into practical and efficient technical solutions. Experienced working in fast-paced environments, collaborating with teams, and delivering high-quality results under time pressure. Proactive, reliable, and eager to contribute to a graduate engineering role while continuing to develop professional skills and industry experience.

WORK HISTORY

Cruise Marshall, 08/2025 to current

SCH Cruise Operations - Portsmouth, Hampshire

- Assist cruise passengers during embarkation and disembarkation, ensuring smooth and efficient flow.
- Handle luggage safely and accurately, supporting passenger comfort and terminal operations.
- Provide directions and customer support to travellers, maintaining a friendly and professional approach.
- Coordinate with security, baggage, and terminal staff to maintain safe passenger movement.
- Communicate clearly with team members via radio or briefings to handle peak periods and quick turnarounds.

Junior software developer, 02/2023 to current

M. Gyamprah Enterprise - Bibiani, Ghana

- Build responsive front-end interfaces for the product catalog, enabling customers to view roofing sheets, building materials, and pricing.
- Develop user-friendly order and quote request pages with search and filtering features to enhance the customer experience.
- Integrate front-end pages with backend APIs to display real-time inventory, availability, and order status.
- Optimize page performance across devices and low-bandwidth networks while fixing responsiveness issues.
- Create reusable UI components and document front-end architecture to support faster development and future maintenance.

Housekeeper, 04/2025 to 06/2025

Brittany Ferries - Portsmouth, Hampshire

- Maintained high cleanliness standards in passenger cabins, lounges, and service areas.

SKILLS

Technical & Professional Skills

- **Programming & Development:**

Python, Java, JavaScript, HTML, CSS, Flask, Spring Boot

- **Databases:** SQL, MySQL, PostgreSQL

- **Tools & Collaboration:** GitHub, Bitbucket, Jira, Slack, Agile methodologies

- **UI/UX & Design:** Figma (prototyping, wireframes, Auto Layout, Components, Variants)

- **Data Analytics & Visualization:** Python libraries for data cleaning and analysis, and Power BI

Transferable Skills

- **Teamwork**
- **Leadership**
- **Adaptability**
- **Communication**
- **Problem-Solving**
- **Time Management**

- Worked efficiently within a fast-paced environment to prepare cabins before sailing deadlines.
- Replenished toiletries, linens, and supplies while keeping workspace organised.
- Supported the housekeeping team to ensure areas met safety and hygiene regulations.
- Responded to passenger requests politely to promote a positive onboard experience.

Housekeeper, 07/2023 to 07/2024

The Queens Hotel - Portsmouth, Hampshire

- Clean and prepare guest rooms to high hygiene and presentation standards, including beds, bathrooms, and surfaces.
- Restock towels, toiletries, and housekeeping supplies while maintaining organised storage areas.
- Report maintenance or repair issues to supervisors to ensure rooms remain safe and functional for guests.
- Respond to guest requests politely and professionally, supporting a positive customer experience.
- Work with the housekeeping team to ensure rooms are ready on time for new arrivals and daily check-outs.

Business Integration Engineer Intern, 03/2022 to 11/2022

M. Gyamprah Enterprise - Bibiani, Ghana

- Integrated fuel station POS sales reports into the central accounting system, enabling faster financial reconciliation.
 - Connected roofing sheet production data to inventory records, ensuring accurate tracking of raw materials and finished goods.
 - Troubleshoot data mismatches between purchase orders, invoices, and warehouse records, resolving errors with operations and finance staff.
 - Documented integration workflows, data mappings, and troubleshooting procedures to support handover to operational teams.
 - Collaborated with factory and station managers to gather requirements, streamline data flows, and recommend process improvements.
 - Monitored scheduled data pipelines, analyzed error logs, and escalated failures to senior engineers for quick resolution.
-

EDUCATION

Bachelor of Science, Software Engineering - First Class, 09/2023 - Current

University of Portsmouth - Portsmouth, England

Foundation Degree in Science, Computing, 01/2022 to 08/2023

International College of Portsmouth - Portsmouth

Doctor of Medicine, Medicine, 12/2019 to 02/2022

Kharkiv National Medical University - Ukraine

WASSCE, 10/2016 to 01/2019

Prempeh College - Ghana
