PROFESSIONAL SUMMARY

First-Class Software Engineering graduate from the University of Portsmouth, achieving an 84.8% average. Experienced in developing and maintaining web applications using JavaScript, Node.js, Express, Python and PostgreSQL through professional work and independent projects. Strong background in full-stack development, REST API integration, database design and problem-solving. Developed and deployed UniStress, a full-stack student wellbeing platform integrating Fitbit data through OAuth 2.0, which achieved 82% in my final-year dissertation. Keen to contribute to building reliable software solutions while continuing to grow as a software engineer.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, SQL
- **Frontend Development:** HTML5, CSS, Responsive Design
- **Backend Development:** Node.js, Express, REST API Development, OAuth 2.0
- **Databases:** PostgreSQL, MySQL
- **Tools & Practices:** Git, GitHub, Jira, Agile, Figma, AI-assisted development

WORK EXPERIENCE

Junior Software Developer **02/2023 – 01/2026**
M. Gyamprah Enterprise – Bibiani, Ghana (part-time, remote)

- Built and maintained the web pages for a product catalogue of over 100 items in HTML, CSS and JavaScript, keeping details and prices current as stock changed.
- Created order and quote request forms so customers could contact the business directly.
- Fixed layout and display issues so pages worked on mobile phones and slower internet connections, which were the real constraints for these customers.
- Wrote documentation so colleagues could maintain the pages after me.

Business Integration Engineer Intern **03/2022 – 11/2022**
M. Gyamprah Enterprise – Bibiani, Ghana

- Entered weekly sales reports from the fuel station POS system into the accounting records.
- Compared purchase orders, invoices, warehouse and production records, flagging discrepancies to staff for correction.
- Documented the weekly reporting process so others could follow it.

PROJECTS

UniStress – Student Wellbeing Platform **Graded 82%**
Final year dissertation | Node.js, Express, PostgreSQL, vanilla JavaScript | https://unistress.onrender.com

- Designed, built, tested and deployed a full-stack application independently: 13 feature modules, a 14-table PostgreSQL schema with indexes and constraints, session authentication, and its own REST API. Proposed for academic publication by my supervisor.
- Integrated the Fitbit Web API through OAuth 2.0. Found that four concurrent dashboard requests could each attempt to refresh the same single-use token, letting a failed refresh overwrite a valid one and silently disconnect the user. Fixed it by holding the in-flight refresh per user so the first request starts it, and the rest await the same result.
- Kept the service inside Fitbit's 150 requests per hour by adding a per-user response cache with stale fallback, so a rate-limited request returns slightly older data rather than an error.
- Traced readings being stored against the wrong day to a mismatch between UTC and local time, found by comparing raw API responses against stored records.

ELE – E-commerce Website **Personal project**
HTML, CSS, vanilla JavaScript | ele-project.onrender.com

- Built a nine-page storefront outside my degree with a cart persisted in localStorage, product data held in data attributes, search and price filtering, and a responsive layout at 1024, 768 and 480 pixels.
- Hardened it after early failures: storage reads wrapped in try/catch and quantities coerced to positive integers.

Text Classification Pipeline – Coursework **Graded 100%**

Python, pandas, scikit-learn, NLTK

- Developed a text classification pipeline using the Wikipedia Toxic Comment dataset, covering data cleaning, preprocessing and feature extraction.
- Compared TF-IDF, Word2Vec and a fine-tuned BERT model, evaluating their performance to assess different approaches to text classification.

EDUCATION

BSc (Hons) Software Engineering – First Class Honours **09/2023 – 07/2026**

University of Portsmouth | 84.8% average, GPA 4.11/4.25

Year 0 in Computing – Technical Stream **01/2023 – 08/2023**

International College Portsmouth, awarded by the University of Portsmouth | 91% average

Medicine (2.5 years, not completed) **12/2019 – 02/2022**

Kharkiv National Medical University – Ukraine

- Studies discontinued due to the war in Ukraine.

WASSCE **10/2016 – 06/2019**

Prempeh College – Ghana

ADDITIONAL EXPERIENCE

Cruise Marshal (part-time), SCH Cruise Operations – Portsmouth **08/2025 – Present**

- Coordinate passenger boarding and disembarkation with security, baggage and terminal teams, communicating by radio to keep turnarounds on schedule during peak periods.

Housekeeper (part-time), The Queens Hotel – Portsmouth **07/2023 – 07/2024**

- Prepared guest rooms to hygiene and presentation standards, reporting maintenance issues so rooms were ready for each check-in.
